UI DESIGNER FOR PORTALS AND WEB APPLICATIONS

Opportunity:

We are looking for a very talented UI designer with significant experience developing portal and web applications. The opportunity will take place in the heart of Orlando, Florida where the weather is perfect, Disney and Universal Studios are nearby and a trip to the beach takes about an hour.

Candidate:

The ideal candidate will have several years of demonstrated expertise designing corporate portals and web systems possessing strong working knowledge of user-centered design methodologies. Special consideration will be given to those individuals with SAP Netweaver, Websphere, BEA, or Sharepoint experience.

Experience:

- Accustomed to tight deadlines, high-profile clients, and has an impressive multi-media portfolio demonstrating superb design skills
- Experience producing highly intuitive user interfaces and navigation schemes
- Experience with name-brand web sites at a high-volume agency is a plus

Skillset:

- Adobe Creative Suite
- Advanced knowledge of CSS, (D)HTML, XHTML, XML, and JavaScript
- Web standards based design
- Well versed in browser and platform issues
- Firefox web developer plugins (Firebug, etc.) and Rapid Prototyping Tools (such as Axure) is a plus

Abilities:

- Simplify the user experience, while making it look good
- Interaction design and information architecture

Responsibilities:

- Produce wire frames, mockups and prototypes
- Documentation, via style guides, usability requirements and visual specifications, to record best practices and design attributes

Requirements:

- BFA, BA/BS or MA/MS in design, UIX, HCI or related degree; however, the equivalent in work experience and self-study may be considered
- Minimum of five (5) years hands-on experience
- Excellent communication skills
- Well versed in all aspects of on-site consulting
