

EXCELLIS CORPORATE OVERVIEW

Our Vision is to compile an elite group of Business and IT associates, who provide broad-based ERP and Web technology and management consulting services. Our associates embody a unique set of complimentary business practices, designed to provide an expansive set of services offerings aimed at the Pharmaceutical and Manufacturing industries.

Our Synergy Approach is the catalyst for delivering results. Our Philosophy is “One and One make **One**”. The consulting teams are trained to integrate with clients to create a common vision and partner for success. This unique synergistic approach leverages the client’s institutional knowledge and our industry and technology expertise, which ensures strategic business alignment and formulates both short and long term goals that produce maximum value.

Our Integrated Practice model is the nucleus for Excellis’ knowledge warehouse and ISEE delivery methodology. By creating complementary business practices, we are able to share, collaborate and validate industry and technology best practices. Once validated we are able to rapidly integrated them into our delivery methodology and deploy to our clients.

EXCELLIS CORPORATE OVERVIEW

Our Resources possess an average of 10 years of industry and IT experience. Led by renowned industry experts and derived from our first-hand experience with ERP and IT deployments with enterprises throughout the world, we are able to design, develop and deploy solutions based on proven best practices and methodologies.

Our Offerings are architected around delivering world-class consulting services and solutions. They encompass our ISEE delivery methodology for complete visioning, planning and execution. All of our services and solutions are designed to help you increase profitability, reduce lead times and costs, focus on your core competencies, and enhance your ability to collaborate with partners and customers.

Our Products are architected around delivering world-class supply chain process consulting, enterprise application implementation, simple and visually appealing user experiences, and IT infrastructure services. Our offerings encompass conventional SAP implementations, design and deployment of solutions in the rapidly evolving Advanced Planning and Scheduling (APS) arena, SAP Enterprise Portals, and supply chain management, RFID and optimization solutions. All of our services and solutions are designed to help you increase profitability, reduce lead times and costs, focus on your core competencies, and enhance your ability to collaborate with partners and customers.
